# Linking Your Community-Based Partnerships to Improvements in Patient Care and Outcomes

---

March 19, 2026 at 2 PM ET

National Center for Medical  Legal Partnership

AT THE GEORGE WASHINGTON UNIVERSITY

## Housekeeping

- Attendees are muted throughout the webinar.
- Type **questions** into **Q&A panel**.
- Send a **chat to the Host & Panelists** for help.
- To activate captions, select **“Live Transcript”** and **“Show Subtitle”**.
- The webinar will be recorded and shared at [medical-legalpartnership.org/resources/](https://medical-legalpartnership.org/resources/)
- **This webinar and all associated content are protected under copyright law. Any unauthorized recording, reproduction, distribution, or use, in whole or in part, whether spoken or written, is strictly prohibited and may result in civil and/or criminal liability.**

NCMLP Learning Opportunity

# Improving Patient Care and Outcomes through Medical-Legal Partnership

HRSA NTTAP 3-Part Webinar Series

This three-part national webinar series will guide health centers through the essential steps of establishing, integrating, and leveraging a medical-legal partnership (MLP) to enhance patient outcomes and advance performance improvement goals.

## **Learning Objectives:**

- Understanding the core components of medical-legal partnerships.
- Examining the best practices for incorporating MLP services into health center workflows.
- Understanding and assessing how an MLP has contributed to a health center's performance improvement in the areas of patient care and outcomes.

## NCMLP Learning Opportunity Improving Patient Care and Outcomes through Medical-Legal Partnership

# OPERATIONALIZING A PARTNERSHIP TO IMPROVE PATIENT CARE AND OUTCOMES

Webinar Series : Improving Patient Care and Outcomes  
through MLP

## Recap from Session 2 (Feb. 26, 2026)

1. Understand key considerations in planning and launching an MLP, including pilot development, scope, structure, and relationship-building strategies.
2. Examine best practices for incorporating MLP services into health center workflows to support sustainable integration.
3. Assess how an MLP can contribute to health center performance improvement, including impacts on patient care, outcomes, and data-driven process enhancements.

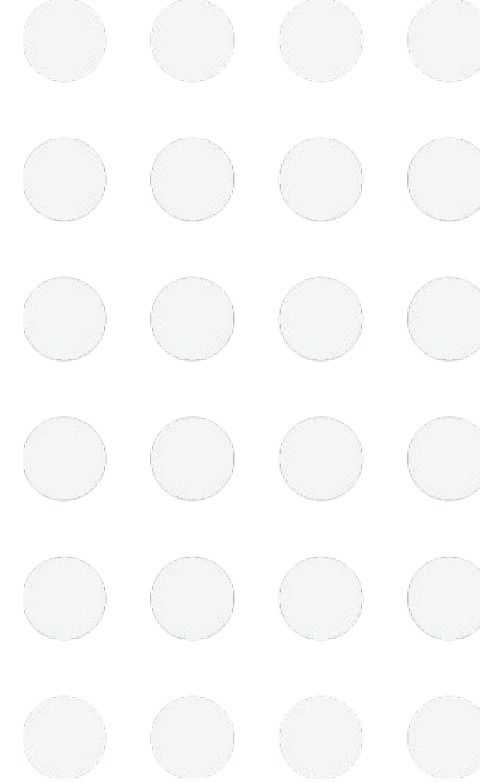

## Today's Learning Objectives

1. Assess how an MLP can contribute to health center performance improvement, including impacts on patient care, outcomes, and data-driven process enhancements.
2. Apply concepts from implementation science and legal epidemiology to strengthen evaluation strategies and make a compelling case for the impact and future direction of MLPs.
3. Identify key elements of successful MLP evaluation and lessons learned from Kaiser Permanente's multisite MLP Initiative.

# Our Speakers

**Omar Martinez, JD, MPH, MS**

Professor  
University of Central Florida College  
of Medicine

**Sheridan Green, PhD, MS**

Associate Investigator, Director  
PiER Center  
Kaiser Permanente Colorado

# Implementation Science to Evaluate Medical-Legal Partnerships: Challenges and Opportunities

*Omar Martinez, JD, MPH, MS*  
*Professor, University of Central Florida College of Medicine*  
*Director, Implementation Science Research Lab*

# Disclosure Statements

- I have **no conflicts of interest to disclose.**
- I have **no financial interests or financial relationships** related to the content presented.
- All research described has been conducted in accordance with applicable ethical standards and has received approval from relevant **Institutional Review Boards.**
- The content is **solely the responsibility of the authors** and **does not necessarily represent the official views of the funding agencies.**

# Outline

- Making the case for MLPs
- Implementation Science & Framework
- MLP Initiatives & Evaluation
- Discussion and Future Direction

# Medical-Legal Partnerships

MLPs offer a **structural integrated intervention** that could facilitate improvements in medical and psychosocial outcomes among systematically and structurally excluded populations.

Through legal aid, MLPs can ensure that patients are able to access comprehensive services in a **respectful and empathetic environment.**

STUDY PROTOCOL Open Access

Examining the impact of medical legal partnerships in improving outcomes on the HIV care continuum: rationale, design and methods

Miguel Muñoz-Laboy<sup>1</sup>, Omar Martinez<sup>2</sup>, Robin Davison<sup>2</sup> and Isa Fernandez<sup>3</sup>

#### Abstract

**Background:** Over the past two decades, we have seen a nationwide increase in the use of medical-legal partnerships (MLPs) to address health disparities affecting vulnerable populations. These partnerships increase

## Bridging Health Disparity Gaps through the Use of Medical Legal Partnerships in Patient Care: A Systematic Review

### USING MLP TO ADDRESS THE LEGAL NEEDS AMONG RACIAL & ETHNIC MINORITIES LIVING WITH HIV

DECEMBER 7, 2022  
1-2:30 PM ET

LED BY OMAR MARTINEZ & KAYLA MCGOVERN

FEATURING

ERIN LOUBIER & AMY NELSON	SONYA HUNT GRAY	THERESA BRABSON & LINDA PEYTON
WHITMAN-WALKER HEALTH We see you.	HRSA Health Resources & Services Administration	LCD Legal Clinic for the Disabled Inclusion, Independence, Justice.

# Health-harming legal needs and risks

A health-harming legal need is a **conflict** between an individual and an entity or private entity or a deprivation of a civil or legal right that directly or indirectly affects a **person's access to, or retention in, health care** (Morton, 2022; Aidala et al., 2016; Gilbert et al., 2019).

# Implementation Science Frameworks

Using frameworks such as RE-AIM (Reach, Effectiveness, Adoption, Implementation, Maintenance) or EPIS (Exploration, Preparation, Implementation, Sustainment), we can evaluate:

**Reach:** Which populations are screened and successfully engaged? Do structurally marginalized communities have similar representation as non-marginalized communities?

**Adoption:** To what extent do healthcare teams integrate legal screening into routine workflows?

**Implementation fidelity and adaptation:** How are tiered legal services delivered across sites, and what adaptations are made to fit local contexts?

**Sustainment:** Are financing mechanisms aligned to support long-term integration?

# Cost savings

Studies show that MLP services **reduce health care spending** on high-need, high-cost patients. MLPs have been shown to save patients' health care costs and recover cash benefits.

## Medical-Legal Strategies to Improve Infant Health Care: A Randomized Trial

Robert Sege, MD, PhD<sup>a</sup>, Genevieve Preer, MD<sup>a</sup>, Samantha J. Morton, JD<sup>b</sup>, Howard Cabral, PhD, MPH<sup>c</sup>, Oluwatomisin Morakinyo, BS<sup>a</sup>, Vonne Lee, MPH<sup>a</sup>, Catarina Abreu, BS<sup>a</sup>, Edward De Vos, EdD<sup>d</sup>, Margot Kaplan-Sanoff, EdD<sup>a</sup>

## Rural Medical-Legal Partnership and Advocacy: A Three-Year Follow-up Study

James A. Teufel, MPH, PhD  
Danilea Werner, MSW, LCSW, MPH, PhD

# MLP Initiatives

# OPAHL TRAINING MANUAL

Version 8.2022

FOR  
MEDICAL, LEGAL,  
AND SOCIAL SERVICES  
PROVIDERS

# On the ground

## 1. **Two social support coordinators screen eligible patients**

- Resiliency based questionnaire
  - If the patient screens positive for a health harming legal need, a referral is made to the attorney
  - If the patient screens positive for a non-legal issue other resources/supports are provided

## 2. **Attorney on-site 1 day a week for in-person consultations**

- Relationship building (i.e., trust)
- Part of the patient's care team

## 3. **Attorney performs an approx. 30-minute intake and gives legal advice**

- Support the patient if needed past the initial consultation (e.g., court involved)

## 4. **Study team performs assessments**

- Baseline and follow-up assessments
- Viral load count

# Results

- **202 participants enrolled**
- In-service clinics
- “Know your rights” sessions
- Ongoing provider education

# Results

Major findings from the preliminary dataset reflect distinct categories of legal concerns reported by participants:

- 1) Personal/Advanced Care Planning (n = 50),
- 2) Other Legal Concerns (n=26),
- 3) Unsafe Housing/Repairs (n=23), and
- 4) Eviction or Threat of Losing Home (n=15).

# Training

**OPAHL  
TRAINING  
MANUAL**

Version 6.2024

FOR  
MEDICAL, LEGAL,  
AND SOCIAL SERVICES  
PROVIDERS

# Categories

## Advanced Directives

(e.g., health care proxies, powers of attorney, wills)

## Consumer Protection

## Education

## Employment

## Family Law

(e.g., abuse prevention orders, adoption, child support, custody, divorce, guardianship of an adult, paternity, visitation)

## Child/Youth Rights

(e.g., dependency, delinquency, emancipation, guardianship of a minor)

## Health Insurance & Access to Care

## Housing

## Income & Economic Benefits

**Individual Rights**  
(e.g., expungement of criminal records, non-discrimination rights of persons with disabilities)

## Other / Miscellaneous

# Discussion

- Advancing Medical-Legal Partnerships Through Implementation Science
- Community-research Collaborations
- Legal Epidemiology

# Community Health Workers

**Engage community leaders** in planning, development, launch, and ongoing quality assessment and improvement.

Include **Community Health Workers** in care team

- Provide social support
- Identify patients' needs
- Link patients to resources
- Outreach, individual and community capacity building

# Evaluation of MLP Programs

Improve **evaluation of MLP programs** for sustainability.

## Sustaining an MLP: Program Evaluation

**Tip:** Collect data to measure progress toward goals and to improve program effectiveness

### Screening and Referrals

- # of patients screened
- # of referrals made to the MLP legal team
- Types of legal issues that were referred
- Where referrals came from at the health center
- Demographics of patients referred

### Legal Services Provided

- # of curbside consults completed
- Types of legal issues for which curbside consults were requested
- # of patients successfully connected with MLP legal team
- # and types of legal issues addressed for patients
- Level of service provided to patients
- \$ value of legal services provided (market rate)

### Outcomes

- Legal outcomes
- \$ value of benefits obtained for patients
- Patient satisfaction and/or perceptions of stress and well-being as measured by surveys
- \$ recovered for health center through successful appeals of health insurance denials
- Changes in clinical and nonclinical staff's knowledge pre- and post-training as measured by surveys

Kaiser Permanente's **mission** is to provide high-quality, affordable health care services **and** to improve the health of our members **and the communities we serve**. The **PiER Center** supports that **mission** by **engaging community** in organizational evaluation, learning, and improvement.

## PiER Mission

We are a values-driven, community-focused applied research and evaluation center that translates findings into policy, practice, and health care delivery. Our work advances health equity by addressing upstream social drivers of health, including:

 Economic Opportunity

 Affordable Housing

 Safe and Supportive Schools

 Healthy Environment

## PiER Values

*Our work is grounded in:*

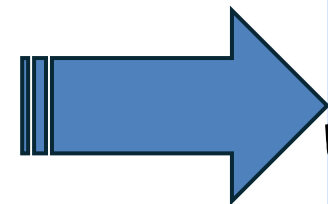

- Advancing Excellence and Innovation
- Centering Community Engagement
- Emphasizing Teamwork and Collaboration
- Elevating Learning and Improvement

# Kaiser Permanente Medical-Legal Partnership Evaluation

## Mixed-Method, Descriptive Longitudinal Design

### Participants...

- Were referred to legal services from their health care providers.
- Received a legal intake and cases were opened when appropriate.
- Participated in study with a self-report survey, and consent to share health and legal records.
- Received legal services.

## Indicators and Measures

### Study examined...

- ✓ Survey asked about social health needs, overall health status, mental health status, and services satisfaction.
- ✓ Legal services dates, services, resolutions, and housing, economic and other outcomes.
- ✓ Health care utilization including emergency department use and inpatient hospitalization.
- ✓ Reach and outcomes by demographics, patient characteristics, and other variables.

**“Every few days they'd have an eviction notice on the door, which is embarrassing, you know...But all the things they were doing, it did get to my health... I'm still being treated for high blood pressure because that's when it all started. [Now] I feel like I'm able to go to the doctor more because I'm not worried that I'll come home and there will be an eviction notice on my door again.”**

# Learning Objectives

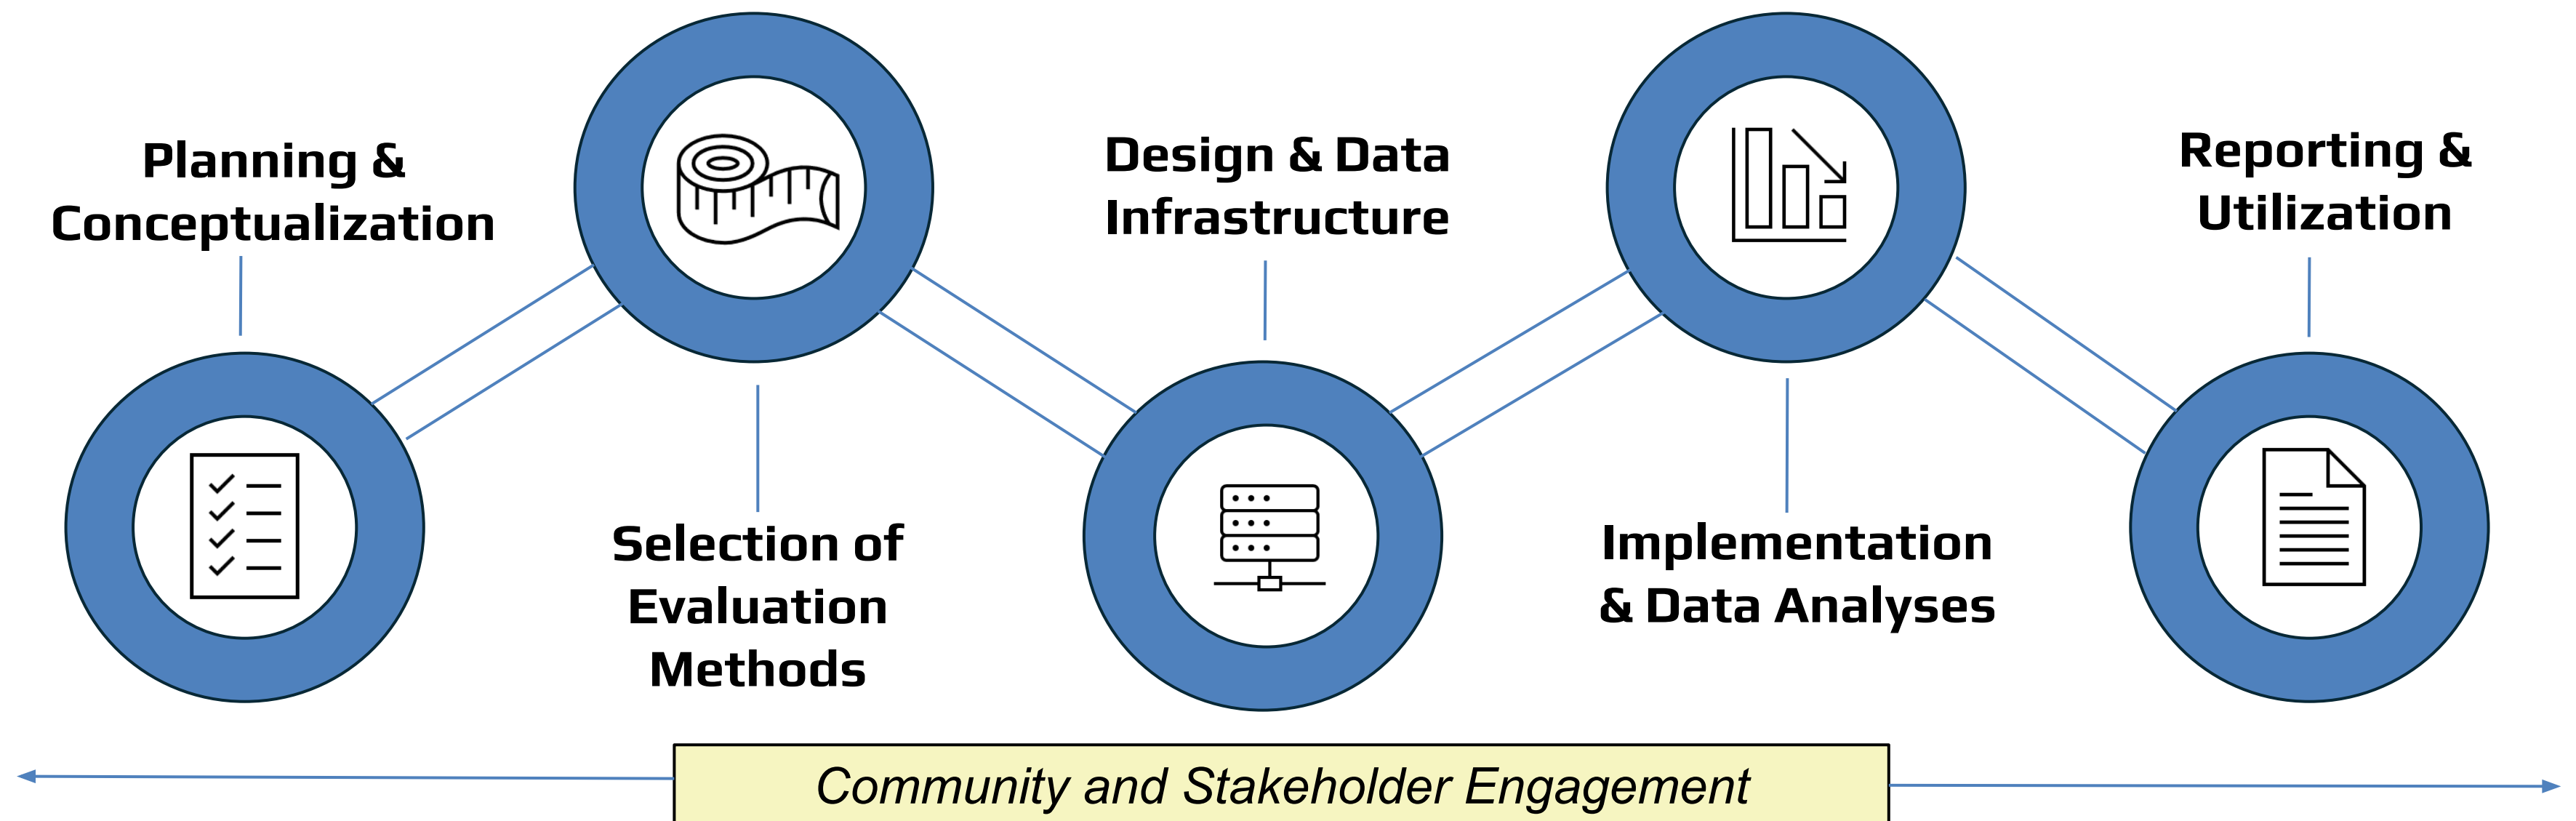

- Introduce key elements of successful evaluation of MLP programs.
- Share lessons learned from implementing an outcomes evaluation at Kaiser Permanente.

## Why Evaluate MLPs?

- Evaluations can improve our understanding of the **limits and benefits** of MLP participation.
- They can provide **evidence** that MLP collaborations are efficient and effective (or not) for individuals and systems.
- Study findings help **refine and improve** program workflows.
- Results can demonstrate whether the MLP has intended **reach, accountability, outcomes, and return on investment.**

# Considerations for Effective MLP Program Evaluation

# Planning & Conceptualization

	TIP	Lessons Learned
	Form <b>clear, shared expectations</b> with community and stakeholders.	We learned that shared attention to crafting the <b>study purpose, design, and evaluation questions</b> can make sure the results will be valuable to you, the community, and other stakeholders at the end.
	If possible, <b>bring evaluators on early</b> in the implementation processes.	It is advantageous to program teams to start (or bring evaluators on) early because it helps to plan ahead to develop systems for successful intervention and outcome tracking that fits with standard workflow.
	Gain <b>financial commitment for evaluation</b> activities along with the program funds.	It is challenging to provide robust evaluation findings with inadequate evaluation funding, commitment and buy-in. Start small, if needed, and build an evaluation to match the resources available.
	Solidify <b>communication</b> plans and <b>data sharing</b> and use agreements early.	Legal services organizations and health care teams can optimize the evaluation by creating a strong communication systems and formal data sharing and use agreements.

# Selection of Evaluation Methods

Collaboration Discussion Questions and **Examples:**

- 1. What parts of our implementation do we want to monitor?**
  - ✓ Referral date, collaboration documentation, case data (dates, legal services, case dispositions and outcomes), health care utilization
- 2. What client and systems outcomes are the most important to us and our community?**
  - ✓ Economic and housing outcomes, physical and mental health outcomes
- 3. What data do we already have access to that can answer our questions?**
  - ✓ Client demographics, legal needs, case data, electronic health data
- 4. What new data collection activities might be needed to answer our questions?**
  - ✓ New information on housing status, client perceptions, and additional resource utilization
- 5. How can we link our legal records with health system data?**
  - ✓ Shared unique client and case identifiers and a good Data Specialist role
- 6. Do we have resources to gather new data directly from the client?**
  - ✓ Surveys, interviews, public records, etc.
- 7. How do we center community and client voices in the findings?**
  - ✓ Client interviews and shared interpretation with community

# Evaluation Design and Setting Up Your Data Infrastructure

Decisions around **design and data infrastructure** are also very important.

While high quality, more rigorous designs are more challenging and expensive than a descriptive study, it may be worth it to obtain stronger evidence of MLP effectiveness.

# Evaluation Implementation and Analyses

## ① Getting started...

- ✓ Create detailed protocols/procedures for data collection and activities.
- ✓ Identify the evaluation team and assign areas of responsibility.

## ② Ongoing evaluation implementation...

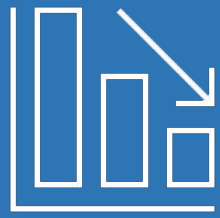

- ✓ Need strong project management including monitoring timeline, activities, budget, staffing, collaborations, and data workflows.

## ③ We have data...now what?

- ✓ Create detailed protocols/procedures for data collection and activities.
- ✓ Identify the evaluation team and assign areas of responsibility.

## ④ Data analysis options...

- ✓ Data analysis is guided by your design and evaluation questions.
- ✓ For interviews or open-ended survey items, a **qualitative** theme coding analytic approach is best.
- ✓ Examine **quantitative** improvements over time and compare between intervention/non-intervention if designed as a quasi-experiment or experiment (RCT).

# Interpreting, Reporting, and Utilizing Findings

## Reporting Findings

- ❑ Who gets access to the findings?
- ❑ Who gets to help interpret the findings?
- ❑ What are implications of the findings for the MLP, community, and other stakeholders?
- ❑ What formats are needed for presenting and reporting the findings?

## Utilization

- ❑ What are lessons learned?
- ❑ What changes can we make based on the findings?
- ❑ What MLP improvements can be made immediately?
- ❑ What changes need to be planned and resourced later?

## Holding a Data Dialogue

- ❑ What did we learn?
- ❑ Who did or didn't we reach?
  - ❑ What were outcomes?
  - ❑ What do these data mean?

## Reflection Questions and Final Thoughts

1. What are you most curious about related to the effects of MLP implementation?
2. What are some easy ways to get started on evaluation that you learned today?
3. What would you say is unique to MLP evaluation?
