

Advance Care Planning During COVID-19

A Town Hall
April 16, 2020

In case of technical difficulties
– yours or ours – relax.

We are recording this town hall,
and will post it on our website.

8 THINGS EVERY MEDICAL-LEGAL PARTNERSHIP CAN DO RIGHT NOW TO RESPOND TO COVID-19

APRIL 2020

Challenges Facing Medical-Legal Partnerships During the Pandemic

On March 30, 2020, the National Center for Medical-Legal Partnership convened a [COVID-19 Town Hall](#) with 250 medical-legal partnership practitioners who identified several challenges they are facing in responding to the pandemic. Many of these challenges are operational in nature, including diminishing referrals due to providers' focus on immediate medical needs, uncertainty about what issues to prioritize, and concerns about how to stay connected now that legal team members can no longer work on site. The strategies in this tip sheet respond specifically to these operational challenges.

Participants also reported difficulties around working on cases remotely, particularly where patient-clients lack access to technology. We recommend that MLP attorneys check out the resources available from the [Legal Services National Technology Assistance Project](#).

Additionally, participants expressed concerns around specific needs the pandemic has created for different populations, and challenges related to rapidly evolving local, state, and federal policies around evictions, public benefits, special education access, unemployment, and estate planning. We curated a [digital digest of resources that can help MLPs](#) respond to some of these issues. This list will be updated regularly throughout the crisis.

This tip sheet was compiled with information from our March 30th COVID-19 Town Hall, and includes insights from Emily Benfer (Columbia Law School), Mallory Curran (Mallory Curran Consulting), Donna Levin and Kerri McGowan Lowrey (Network for Public Health Law), Randy Retkin (LegalHealth, NYLAG), Keegan Warren-Clem (Texas Legal Services Center), and staff from the National Center for Medical-Legal Partnership.

01

Let health care providers drive your MLP's immediate response and service priorities.

How frequently legal teams hear from their health care partners right now will vary significantly based on the depth of the partnership when the crisis began. Regardless, as health care providers reach out to legal team members with concerns and questions about what they are seeing, MLPs should pivot consults and services to focus on answering their questions and providing support to address their concerns.

For example, the team at LegalHealth, a division of the New York Legal Assistance Group (NYLAG) in New York City, has heard from a lot of health care providers about individuals who are experiencing homelessness coming to the ER when they should be going to shelters. In response, LegalHealth has been doing advocacy with NYLAG's Shelter Advocacy Project to push for beds in shelters and in other isolation facilities where medically needed.

COVID-19 Resources for MLPs

Delivering Telelegal Services During COVID-19

Perspectives from Rural & Urban MLPs

Thursday, April 30 at 1 p.m. Eastern

Today's Participants

Organizations	Number
Legal Services	44
Health Centers	23
Hospitals	5
Law Schools	9
Other	15

Biggest ACP Questions

- Challenges with electronic signatures, remote notarizations, reaching clients with limited access to tech
- Desire for templates that can be used
- Role of advocates vs. SWs vs. attorneys in ACP
- Population concerns (cultural sensitivity, legality of ACP for folks with dementia, outreach to folks unstably housed)
- ACP for HC staff
- Pursuing custody/guardianship cases when courts have limited services

Topics for Today's Advance Care Planning Town Hall

- Clinical Context for ACP Right Now: Why is it important, where should it occur and what are the goals? (Dr. Rebecca Sudore)
- Legal Barriers to Remote Execution & Potential Solutions: State laws, status of pandemic orders, principles of informed consent, and ethical issues for MLP attorneys. (Sarah Hooper)
- Q & A featuring ACP presenters and Randye Retkin, LegalHealth, NYC

Outline

- ACP: The Clinical Context
 - The goal of ACP
 - ACP during COVID-19 crisis
 - Tools to help clients/patients
- ACP: Legal Barriers & Strategies
 - Common barriers in state laws
 - Status of pandemic orders
 - Strategies to help clients/patients

What is Advance Care Planning?

- **Definition:** ACP is a process that supports adults at any age or stage of health in understanding and sharing their personal values, life goals, and preferences regarding current or future medical care.
- **Goal:** The goal of ACP is to help ensure that people receive medical care that is consistent with their values, goals and preferences during serious and chronic illness.”

Why is ACP Important?

- Improved patient satisfaction with care
- Improved quality of life
- Less unwanted medical care aligned with wishes
- Less stress for the surrogate decision maker

Advance Care Planning Realities

- Advance care planning ~ 33% for the past 10 years
- Lower among minority populations, ~ 15-20%
- ~ 10-20% discussed wishes with medical provider
- Among ICU decedents, ~ 20% no ACP before death

COVID-19 Clinical Realities

- Serious illness affecting both young and old (median 56 yrs)
- Clinical picture can worsen very quickly
- Families, surrogates not able to visit ER/hospital
- Older patients not bringing hearing aids, glasses, or cell phones or chargers
- Frontline providers are **DESPERATE** to know any information about the person and family contacts

**Online Advance Care
Planning Program in
English & Spanish**

www.prepareforyourcare.org

Health Literacy Considerations

- Average reading level in the US = 8th grade
 - Medicaid and elderly = 5th grade
- Most advance directive documents written beyond the 12th grade (post-graduate) level.

Language Considerations

- 61 million people in U.S. (~20%) speak language other than English at home
 - 40 million Spanish, 3.4 million Chinese
- Lack of linguistically-appropriate materials

Cultural Considerations

- Non-Western views on autonomy & decision making
 - ~20% do not want to make own medical decisions
- Mistrust and experiential racism
 - Minorities given less information by clinicians and less time for discussion → mistrust forms

Easy-to-Read Advance Directive (AD)

RCT:

- Doubled completion rates
- Overwhelmingly preferred
regardless of literacy/ language

10 languages

California Advance Health Care Directive

This form lets you have a say about how you want to be cared for if you cannot speak for yourself.

This form has 3 parts:

Part 1 Choose a medical decision maker, Page 3

A medical decision maker is a person who can make health care decisions for you if you are not able to make them yourself.

This person will be your advocate.

They are also called a health care agent, proxy, or surrogate.

Part 2 Make your own health care choices, Page 7

This form lets you choose the kind of health care you want.

This way, those who care for you will not have to guess what you want if you are not able to tell them yourself.

Part 3 Sign the form, Page 13

The form must be signed before it can be used.

You can fill out Part 1, Part 2, or both.

Fill out **only** the parts you want. Always sign the form in Part 3.

2 witnesses need to sign on Page 14, or a notary on Page 15.

How To Ask Doctors the Right Questions

Summary of My Wishes

Step 1: Choose a Medical Decision Maker

- You have chosen and asked John Doe (your spouse/partner) to be your decision maker
- You want John Doe to make medical decisions for you only if you cannot make your own decisions

Step 2: Decide What Matters Most in Life

- What is most important to you are: family and friends, religion, living on your own and caring for yourself, not being a burden on your family
- You feel that there may be some health situations that would make your life not worth living, such as never being able to wake up from a coma
- You want to try treatments for a period of time, but stop if you are suffering

Step 3: Choose Flexibility for Your Decision Maker

- You chose TOTAL flexibility in medical decision making for your decision maker

Step 4: Tell Others About Your Wishes

- You told your decision maker about your wishes. But you have not yet told your doctor and family and friends

Step 5: Ask Doctors the Right Questions

- When making decisions with your doctor, you want to share decision making with your doctor
- You **WOULD** want your doctor to tell you how sick you are or how long you have to live

California Advance Health Care Directive

Part 1: Choose your medical decision maker California Advance Health Care Directive

Part 1 Choose your medical decision maker ?

Your medical decision maker can make health care decisions for you if you are not able to make them yourself. ?

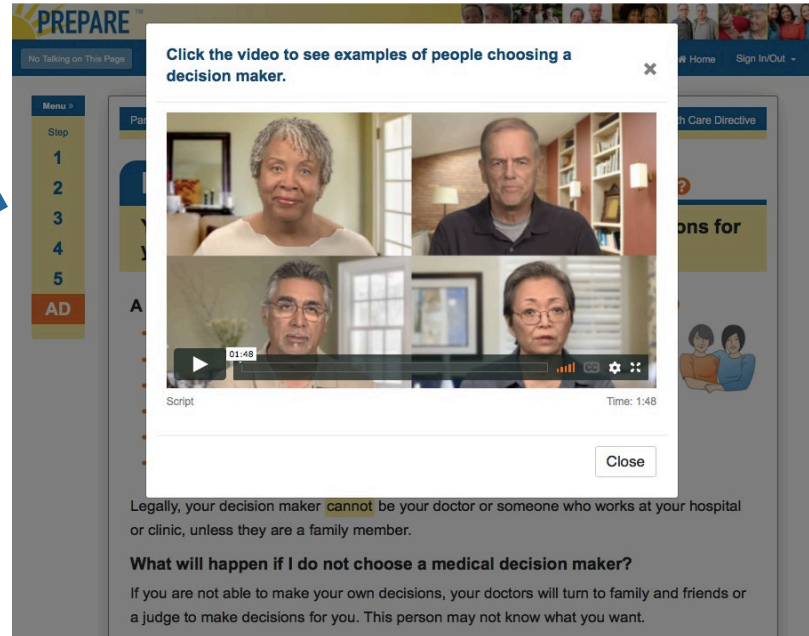

A good medical decision maker is a family member or friend who: ?

- is 18 years of age or older
- can talk to you about your wishes
- can be there for you when you need them
- you trust to follow your wishes and do what is best for you
- you trust to know your medical information
- is not afraid to ask doctors questions and speak up about your wishes

Legally, your decision maker **cannot** be your doctor or someone who works at your hospital or clinic, unless they are a family member.

What will happen if I do not choose a medical decision maker?

If you are not able to make your own decisions, your doctors will turn to family and friends or a judge to make decisions for you. This person may not know what you want.

Question 4. How Do You Balance Quality of Life with Medical Care?

If you were so sick that you may die soon, what would you prefer?

- Try all life support treatments that my doctors think might help. I want to stay on life support treatments even if there is little hope of getting better or living a life I value.
- Do a trial of life support treatments that my doctors think might help. But, I do not want to stay on life support treatments if the treatments do not work and there is little hope of getting better or living a life I value.
- I do not want life support treatments, and I want to focus on being comfortable. I prefer to have a natural death.
- I am not sure.

What else should your medical providers and medical decision maker know about this choice? Or, why did you choose this option?

Part 2: Make your own health care choices California Advance Health Care Directive

How Do You Balance Quality of Life with Medical Care?

Sometimes illness and the treatments used to try to help people live longer can cause pain, side effects, and the inability to care for yourself.

Please read this whole page before making a choice.

AT THE END OF LIFE, some people are willing to live through a lot for a chance of living longer. Other people know that certain things would be very hard on their quality of life.

Life support treatment can be CPR, a breathing machine, feeding tubes, dialysis, or transfusions.

Check the **one** choice you most agree with.

If you were so sick that you may die soon, what would you prefer?

- Try all life support treatments that my doctors think might help. I want to stay on life support treatments even if there is little hope of getting better or living a life I value.
- Do a trial of life support treatments that my doctors think might help. But, I DO NOT want to stay on life support treatments if the treatments do not work and there is little hope of getting better or living a life I value.
- I do not want life support treatments, and I want to focus on being comfortable. I prefer to have a natural death.

What else should your medical providers and decision maker know about this choice? Or, why did you choose this option?

150 characters left

A program to help you make medical decisions for yourself and others

- Step 1** Choose a medical decision maker.
- Step 2** Decide what matters most in life.
- Step 3** Choose flexibility for your decision maker.
- Step 4** Tell others about your medical wishes.
- Step 5** Ask doctors the right questions.

www.prepareforyourcare.org

Step 1 Choose a Medical Decision Maker

Choose someone you trust to help make decisions for you in case you become too sick to make your own decisions.

A good decision maker will:

- ask doctors questions
- respect your wishes

If there is no one to choose right now, do Steps 2, 4, and 5.

How to say it:

"If I get sick in the future and cannot make my own decisions, would you work with my doctors and help make medical decision for me?"

OR

"I do not want to make my own medical decisions. Would you talk to the doctors and help make medical decisions for me now and in the future?"

Step 2 Decide What Matters Most in Life

This can help you decide on medical care that is right for you.

Five questions can help you decide what matters for your medical care:

1. **What is most important in life?**
Friends? Family? Religion?
2. **What experiences have you had** with serious illness or death?
3. **What brings you quality of life?**
Quality of life is different for each person. Some people are willing to live through a lot for a chance of living longer. Others know certain things would be best on their quality of life.

Step 3 Choose Flexibility for Your Decision Maker

4. If you be r...
 - To if y of
 - Or tim
 - Or co

Flexibility gives your decision maker leeway to work with your doctors and possibly change your prior medical decisions if something else is better for you at that time.

How to say it:

Total Flexibility:
"I trust you to work with my doctors. It is OK if you have to change my prior decisions if something is better for me at that time."

Some Flexibility:
"It is OK if you have to change my prior decisions. But, there are some decisions that I never want you to change. These decisions are..."

No Flexibility:
"Follow my wishes exactly, no matter what."

Step 4 Tell Others About Your Medical Wishes

This will help you get the medical care you want.

How to say it:

To your decision maker and doctors:
"This is what is most important in my life and for my medical care..."

To your doctor and family and friends:
"I chose this person to be my decision maker and I want to give them (TOTAL, SOME, or NO) flexibility to make decisions for me."

Your doctors can help you put your medical wishes on an advance directive form.

Step 5 Ask Doctors the Right Questions

- Write down questions ahead of time.
- Bring someone with you.
- Tell doctors at the start of the visit if you have questions.

How to say it:

If your doctor recommends something, ask about the:

- **Benefits** – the good things that could happen
- **Risks** – the bad things that could happen
- **Options** for different kinds of treatment
- **What your life will be like after treatment**

Make sure you understand:
"What I'm hearing you say is... Is this right?"

Outline

- ACP: The Clinical Context
 - The goal of ACP
 - ACP during COVID-19 crisis
 - Tools to help clients/patients
- **ACP: Legal Barriers & Strategies**
 - Common barriers in state laws
 - Status of pandemic orders
 - Strategies to help clients/patients

Common Barriers in State Laws

Barrier	States
Requires Live Witnessing	AL, AK, AZ, CO, CT, DC, DE, FL, IL*, IA, IN, KS, KY, MA, MI, MN, MO*, MT, NE*, NV, NH, NJ, NY, NC, OH, RI*, SC*, TX, VT, VA, WA*, WV, WI*
Requires Notarization	CO, IN*, MO, NC
Add'l Reqs (SNFs, DPOAs)	CA, CT, DE, MI, ND, SC, TX, VT
No Digital Signature Legislation	All but CA, IL, MD, TX ID and ME affirmatively bar digital signatures on ADs
	* = req'd just for living will or DPOA portion

Pandemic Orders

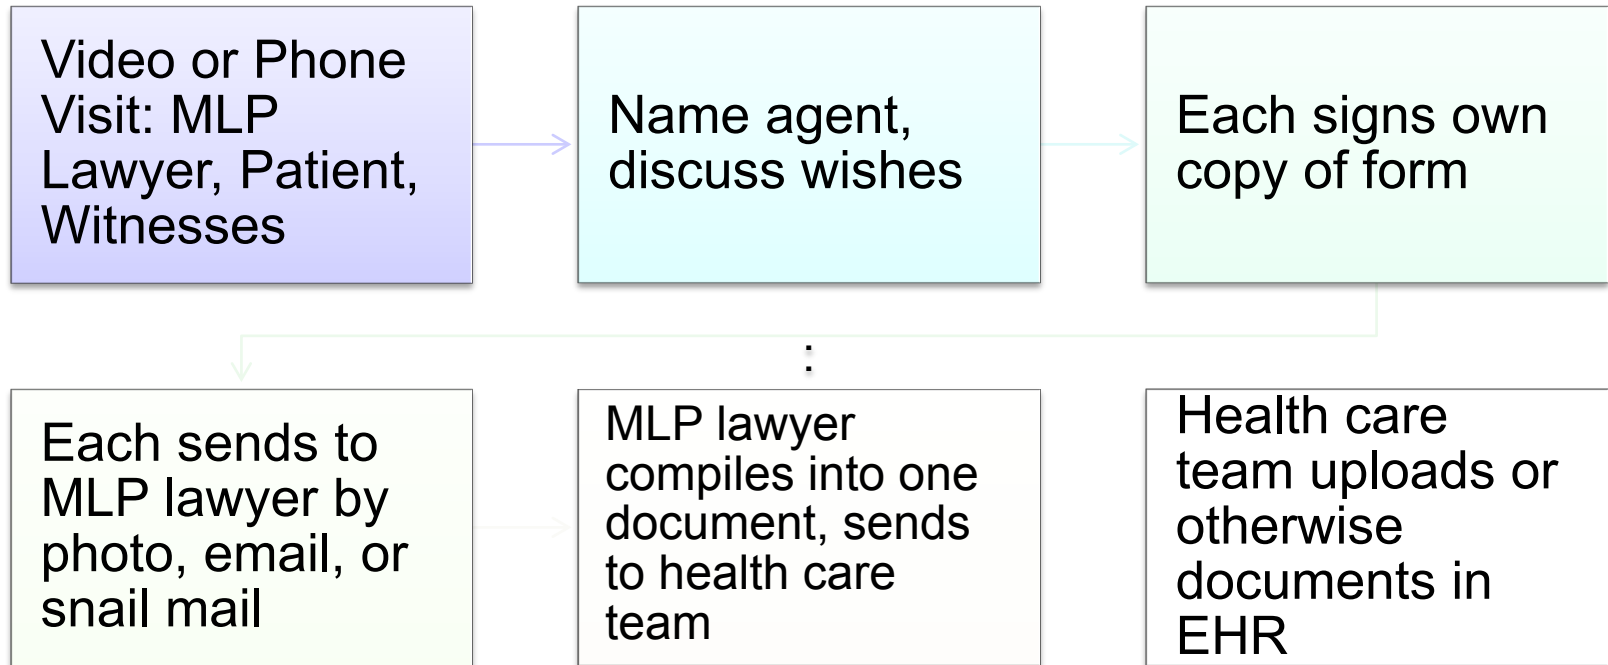

- Executive authority to waive or modify regulations & guidance while emergency orders in effect (scope varies, unclear)
- E-notarization on wills/trusts: AL, AK, AZ, AR, CA, CO, CE, GA, HI, ID, IL, IN, IA, KS, KY, ME, MD, MI, MS, MD, NE, NH, NM, NY, RI, TN, VT, TX, WI, WY (as of 4/15/20, source: ACTEC.org)
- Cautions:
 - Limitations, exclusions!
 - Applicability to ADs unclear
 - Cost/technology still an issue for some MLP patient/clients

State Policy Ideas (CA example)

- ❑ **Obtaining patient signature:** Clarify that California Probate Code §4673(a)(2) permits healthcare providers or witnesses to sign advance directives “at the direction of” the patient via a telehealth or phone visit and that such visit satisfies the “in presence of” requirement.
- ❑ **E-notarization:** Clarify that California Civil Code §1189(b) permits e-notarization for advance directives in California where the e-notary is otherwise duly licensed and authorized by another state.
- ❑ **Digital signatures:** Waive digital signature authentication requirements at California Probate Code §4673 (b)(1-7).
- ❑ **SNF residents:** Clarify that, for residents of skilled nursing facilities, the patient advocate or ombudsman may conduct witnessing under California Probate Code §4675 via telephone or web-based visits with the resident.
- ❑ **Patient signature on POLST:** Clarify that a patient or legally authorized representative’s signature on a POLST may be obtained by a treating physician in the same manner as an advance directive as above.

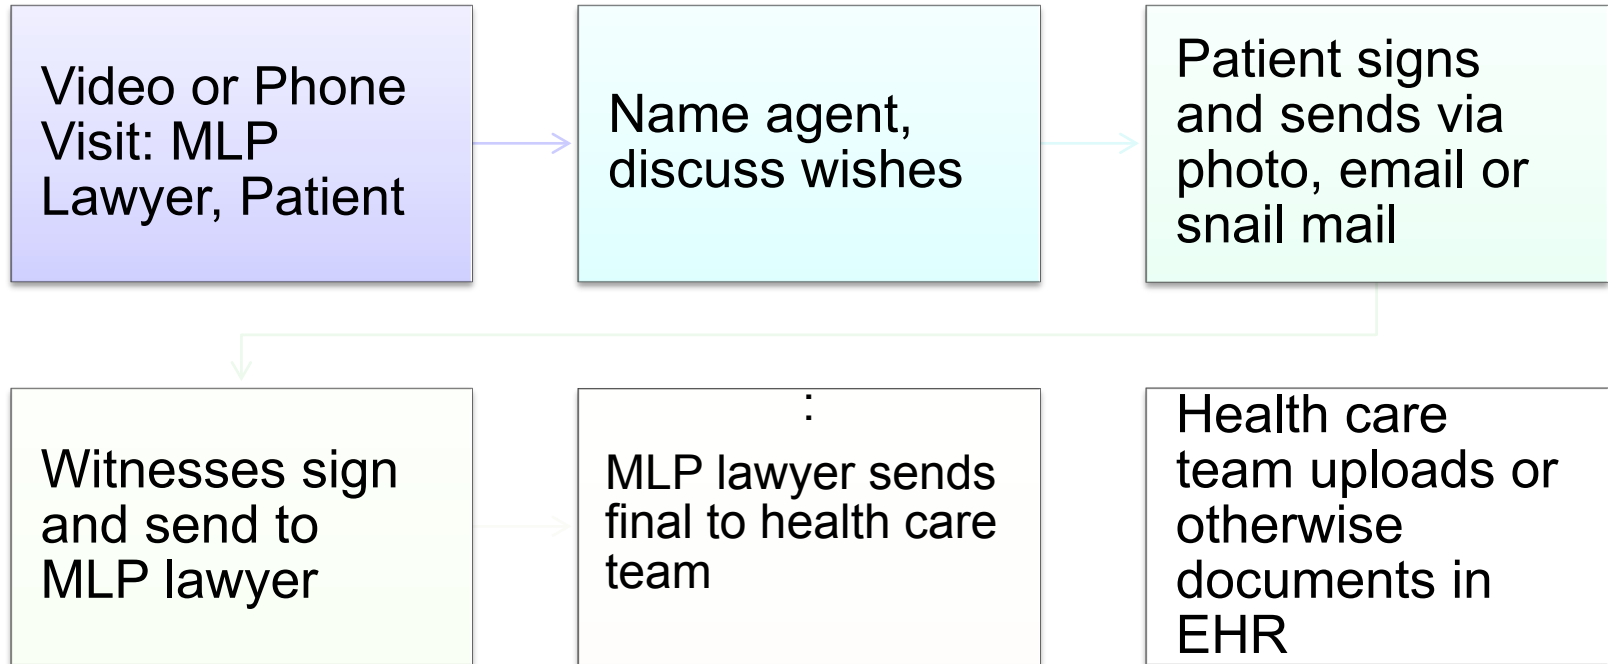

On-Ground Strategies: Synchronous Signing

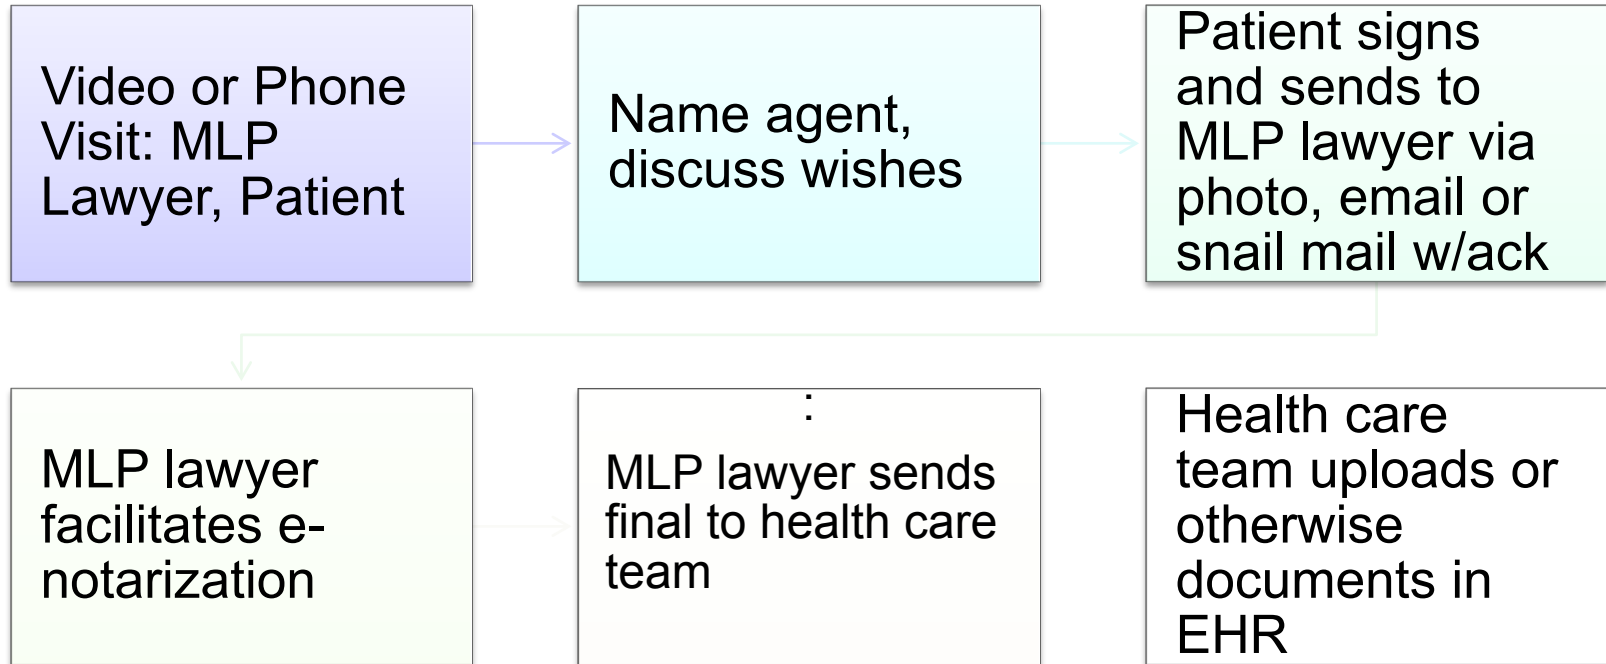

On-Ground Strategies: Asynchronous Signing

On-Ground Strategies: Asynchronous Signing

Creativity, Risk & Ethics

- Back to basics:
 - Read your statute thoroughly- don't rely on statutory forms as law
 - Specific instructions (living wills) diff than DPOAH
 - Remember basic principles:
 - Known wishes of patient always entitled to respect
 - ADs are just *evidence* of conversations/wishes
 - What other evidence/documentation can you help construct?
- Risk tolerance up to professional judgment, local law and environment
- MLP legal teams should be clear about ethical role here (not risk managers)

Best Practices Resources

Questions

- Can social workers, assistants, students do ACP?

Due to COVID-19, Advance Care Planning is Imperative: We All Need to Pitch In

Regardless of healthcare profession, please address basic ACP during phone, video, or in person visits. Any ACP done now may save patients, families, and other providers from uncertainty and stress later on.

What You Can Say:

STEP 1: Ask About a Surrogate Decision Maker

"I wanted to take a moment to talk to you about advance care planning. This involves choosing an emergency contact and the medical care that is important to you."

"First, I would like to ask if there is someone you trust to help make medical decisions for you if there ever came a time you could not speak for yourself?"

If yes: "That's great. If not already, now is a good time to reach out and tell them that you chose them for this role and what is important to you. That way they can be the best advocate and speak up for you if needed."

"I will make sure I put this in your medical record. It is also important to keep their name and phone number on hand, both on your phone and also written down in your purse or wallet."

If no: "It is OK if you cannot think of someone right now. If someone comes to mind in the future, please let your medical providers know so we can put the information in your medical record."

STEP 2: Ask about Advance Directives

"Have you ever completed an advance directive? This is a legal form that lets you write down the name of your medical decision maker and your wishes for medical care." What about a POLST form?

If yes: "That's great. Do you remember what you wrote down? Do you still feel the same way? Do you know where this form is?"

"The most important part is to now share the information in this form with your family and friends. It is also important to bring a copy of the form with you if you need to come to the clinic or hospital. That way your family, friends, and medical providers will know what is most important to you."

If no: "This is OK. [\[Example, use local preference\]](#) A good place to start is a website called PREPAREforYourCare.org. It has simple information and advance directive forms for free and COVID-19 specific information and resources. You can get the website on a smartphone, a tablet, or a computer. You can even do this with your family and friends. That website again is PREPAREforYourCare.org. You can download the form to fill out on your computer or print to out."

[Optional due to social distancing]: "The forms sometimes need extra witnessing or a notary to be legal. While we are practicing social distancing, if you fill out the form it is OK for now to just sign and date it. And, it is really important to share the information with your family and friends and medical providers. These conversations are the most important part. Bring a copy of the form with you if you need to come to the clinic or hospital.]"

Questions

- What if people have dementia or COVID-specific wishes or wishes not on the directive?

What else should your medical providers and medical decision maker know about you and your choices for medical care?

OPTIONAL: How do you prefer to get medical information?

Some people may want to know all of their medical information. Other people may not.

If you had a serious illness, would you want your doctors and medical providers to tell you how sick you are or how long you may have to live?

- Yes, I would want to know this information.
- No, I would not want to know. Please talk with my decision maker instead.

If you want, you can write why you feel this way.

* Talk to your medical providers so they know how you want to get information.
